

PROTECTIVE COVERS EVERLAST PLUS

Material & Care

MATERIAL

- Polyester fabric EVERLAST PLUS.
- Customised in Germany.
- The material used fulfils all the requirements of the European REACH regulation.

PROPERTIES

- Usable all year round.
- Weatherproof and breathable.
- Highly tear-resistant and abrasion-resistant.
- Dirt and water repellent.
- Offers UV protection and maximum light fastness.
- The protective covers are floor-length and have a drawstring with additional eyelets in the hem.

CARE

We recommend:

- It is usually sufficient to use a slightly damp cloth for cleaning to remove dirt completely. A soft microfiber cloth is best. If necessary, use a soft sponge or a soft brush and lukewarm soapy water, avoiding vigorous rubbing. Then rinse the fabric with fresh water. Soiling can also be rinsed off with a light jet of water (not high pressure).
- Then allow the protective cover to dry thoroughly. Only fold the protective cover when dry to prevent mould stains from forming.
- Never use cleaning agents containing chlorine, acids, solvents or aggressive cleaning agents.

NOTE:

- Ensure that water can run off the protective cover and make sure there is sufficient ventilation between the furniture and the cover. Plastic wedges or similar spacers are suitable for this purpose.
- Remove snow load immediately.
- Regularly removing the protective cover for short periods helps to prevent waterlogging or condensation and thus mould or mildew stains.
- The protective cover should not rest on the ground all round. Ensure ventilation by keeping a distance from the floor.
- Never leave cushions under the protective cover for long periods (weeks). Remove the protective cover from your furniture regularly so that it can breathe.
